We are committed to ensuring that we cause minimal negative environmental impact to our surroundings during the course of our work. We shall achieve this through the implementation of our environmental arrangements as listed below, coupled with Training & Information shared with all involved.

We aim to meet the legal and moral obligations expected from us, but to also provide peace of mind to our clients that environmental issues are dealt with, thus providing clients with knowledge their environmental strategies are being correctly implemented. The results achieved will be that an environmental protection chain is formed and utilised.

Our aims are simple.....

- To ensure that Environmental Legislation, Regulations and Standards are observed at every stage of all projects, and during the day-to-day running of the business
- To be aware of & monitor the key "environmental impacts" relating to our work.
- To ensure effective lines of communication with our advisors, customers, suppliers and workforce relating to environmental issues and requirements, with an environmentally minded culture.
- To be aware of & follow Site Waste Management Plans when applicable
- To control and reduce amount of wastage generated during our works
- To recycle where possible, investigate and use recycled products, wherever reasonably practicable to do so.
- Any timber products shall be purchased from FSC certified sustainable resources with timber usage analysis carried out on large projects.
- Use lead & solvent free products whenever permitted
- To utilise control measures to ensure that any adverse environmental implications are kept to an absolute minimum, and where any issues or complaints should arise investigate, negate and readdress the issue to ensure there is no repetition.
- To be a company customers will want to use and will trust, safe in the knowledge that their environmental responsibilities are safe in our hands
- We will investigate & act upon any instances whereby anyone behaves or acts in a manner which harms the environment or contravenes the statements made here. Any negligence identified will result in action taken against the parties concerned
- To review this policy statement on a regular basis to ensure that it is working effectively and clearly understood by all.
- We will monitor our Environmental performance regularly by using any feedback received & via our Management Teams ongoing supervision of projects undertaken.

Signed:

Ian Hunt (Managing Director)
